

January is Radon Action Month

Radon is colorless, odorless gas that causes lung cancer. What are the leading causes of lung cancer? Smoking, radon exposure and secondhand smoke – surprisingly, in that order.

Some homes in our neighborhood have these funny looking exhaust fans on the side of them. What are those fans? They are radon fans.

If you haven't tested your home, you need to. Go to <http://www.epa.gov/radon> for more research. Testing and Remediation is very affordable.

Homeowners can order a test kit for \$5 at www.911radon.com by entering promo code TSTNOW. What's stopping you from testing your home? Your family's health is too important not to.
